

1) Local Telephone/Long Distance - No RFPs were provided. The local incumbent telecommunications provider, Verizon, was selected and Tariff rates are paid.

2) Data Circuits (T1s) – No RFPs were created. The local incumbent telecomm, Verizon that has been providing telecommunications service to the District under Tariff rates was selected, as these services are also Tariff.

3) Verizon Wireless – No RFPs were created. This service is selected by the District Business Office and no formal RFP is required for this service type under local procurement code.

4) Arch Paging – No RFPs were created. This service is selected by the District Business Office and no formal RFP is required for this service type under local procurement code.

Internal Connections – No RFP was created. Romoland Elementary School District utilized the California Multiple Award Schedule (CMAS) as the procurement vehicle. CMAS is a pre-negotiated and competitive “master agreement” by the California Department of General Services, Procurement Division. This effectively streamlines the procurement cycle for State and Local Government Agencies as the competitive bidding process has already taken place.

School Districts are allowed to piggyback with CMAS to procure products and services (Public Contract Code sec. 10299) from the vendor that provides the “best value”. Spectrum Communications has been selected by Romoland Elementary School District based upon the following criteria:

- They have successfully completed several Information Technology Projects for Romoland Elementary School District in the past, with minimal change orders.
- They have exceeded expectations above and beyond the requirements of the Scopes of Work.
- They have provided valuable assistance with project management with no additional cost to the Romoland Elementary School District.
- Any and all disputes and dissatisfaction has been resolved with minimal resource impact to the Romoland Elementary School District.

- They have intimate and detailed knowledge of Romoland Elementary School District's Information Technology Network and function as a partner with the District and not just another vendor selling goods.
- Spectrum Communications is a qualified CMAS supplier.

3. Please provide complete copies of all bids that were received.

Please see the attached bids.

4. Please provide complete documentation indicating how and why you selected the service provider(s) selected. This documentation should include a description of your evaluation process and factors you used to determine the winning contact(s).

1. Telecomm Services – Incumbent providers were selected, by the District Business Office.

2. Internal Connections – Spectrum Communications was selected by Romoland Elementary School District under the CMAS procurement program and other applicable procurement codes. Spectrum Communications provides the most cost-effective product, with the least amount of hassle, and exceeds District requirements for Information Technology projects. Spectrum Communications understands the Business Operations of Romoland Elementary School District, due to the many years that this vendor has been successfully utilized for Information Technology Projects. It is allowable under California Public Contract Code for Romoland Elementary School District to select Spectrum Communications under the CMAS agreement without further competitive bidding.

5. Please provide a copy of the consulting agreement(s) related to the planning, implementation, and support of your E-Rate funding request(s).

Romoland Elementary School District has not, and does not have paid consultants related to E-Rate. The District may request vendor assistance with the E-Rate processes and procedures where it is allowable and necessary (such as providing information related to technical parameters, quotes, etc.), but the District takes sole

responsibility for the entire E-Rate process from planning, implementing, and supporting the E-Rate funded requests.

6. Please provide a copy of all correspondence between your service providers and consultants and the school regarding the competitive bidding process and the application process.

Please see the attached correspondence.

Ms. Ransegnola, I sincerely hope that the information provided is sufficient for your review and use. If it is not, please do not hesitate to contact me further. I am also attaching the other required sections (Fax Back pages, resource plan, implementation plan, budget documentation, tech plan, etc.), or Part II of this review Romoland Elementary School District appreciates all the assistance that the SLD has provided for technology through the E-Rate program.

Thank-you!

Sincerely,

Mr. Dave Guckert
Facilities Director
Romoland Elementary School District

The following is our response to your request for information on the Romoland School Districts year 5 E-rate application.

Hardware

The Romoland School District continues to invest in technology. The District practices site based management, which permits maximum latitude to school site principals and staff in meeting the District educational goals. This approach is also used for technology with many decisions made at the school site level. The acquisition of hardware, software and staff development is supported both by District funds and funds for which schools are given discretion. An example of school site funds would be School Improvement Program (SIP) funds, which are allocated to the schools. Additionally with some programs such as SIP, a group that includes parents, staff and community members meet to guide expenditure of funds. These groups have in the past been extremely supportive of technology and there is every indication that this support will continue.

Romoland School District has been successful in obtaining technology funding and resources from programs other than E-rate. Some, but not all of the programs that have been utilized by the District for Technology related projects are as follows:

ESSA; Title Programs: Romoland School District is a recipient of funding under the Federal Elementary and Secondary Schools Act. Also known as the Title Programs the funding for this program can be utilized for expenditures related to but not supported by E-rate, such as Professional Development, end-user application software purchases, curriculum development, etc.

AB 1339, KNOX Bill: Romoland School District has and will continue to receive money from the State of California under this bill. This particular State grant provides up to \$20/per student based on ADA (average daily attendance) for grades 4-8. The intent of these funds is to provide training for instructional staff on integrating technology into teaching.

- **Prior E-rate Discounts:** Romoland School District has received a total of \$1.1m dollars in E-rate matching funds during program years 2,2 out of window,3,& 4

In Summary, the Romoland School District has invested significantly in the past and continues to invest in technology resources that benefit education. The District has and continues to use both General fund and Categorical fund monies to meet these obligations. In addition to direct financial support, the Romoland programs are supported by strong consensus driven technology standards.

Hardware:

- For year 5 we are requesting 0 servers and a total of 50 network drops at Romoland Elementary School, and 287 network drops at Harvest Valley Elementary School. Our hardware inventory is included as attachment # A

Professional Development:

- Romoland School District Employs a trainer two days a week to teach two hour classes after school hours. The Training center is located at the District Office and is comprised of 14 multimedia workstations capable of multiple operating systems and all the applications available in the District.
- All Romoland School District Staff Are encouraged to take advantage of the various training programs offered. Training sessions are offered in a wide variety of areas including basic computer skill, basic internet and network skills, basic application usage skills, intermediate to advanced application skills with an emphasis on job applicability whether it is in the classroom or the office staff, Network management applications for Technology Committee members and other more advanced staff. Financial software for business office staff, student information system training for secretaries, and specialized trainings for proprietary systems such as Jostens and Accelerated Reader, and independent study sessions for long term project based learning.
- Train the trainer methods are utilized where beneficial as in the case of the Accelerated Reader program where a pilot group learned the system in order to spread the program throughout the school, teaching their peers, following their own mastery of the application.
- Romoland School District also has at least one "Technology Champion" at each school site to help with the integration of technology into curriculum and instruction. This Champion receives a stipend plus up to 40 hours of specialized training.
- Romoland School District also leverages the CTAP (California Technology Assistance Project) teacher training "university" to provide the instructional staff with ongoing and continuous professional development in technology.

Retrofitting

- Romoland School District has a total of two school sites. One site underwent a modernization project in 2000. The resulting improvements included electrical upgrades, air conditioning and infrastructure modifications. These projects totaled \$249,000. Our other site is 5 years old and we do not anticipate the need for any significant improvement to accommodate technology.

Budget

- Our budget covers the time period of 7/02 thru 6/03

Bids

- Romoland School District is in the third and final year of a contract with Spectrum Communications (CMAS contractor). During this time they have preformed in an exemplary manner. All services and goods provided have been of top quality.
- Local telephone, Data, and Wireless service were provided by our local incumbent telecommunications provider, Tariff rates are paid. Verizon remains a long term vendor to the Romoland School District. No RFP is required for these types of services under local procurement code.

Schools & Library Div.
From: David Guckert
Romoland School District
Subject: Selective review yr 2002
Date: 1/24/03

In response to your inquiry regarding our vendor selection process, I offer the following overview.

In January of 2000, the Romoland School District received proposals for internal connections. Our contract was to be renewable up to five (5) years. There were two(2) responses to our posting. They were Spectrum Communications, Corona, CA and Osicom Technologies, Inc. Westborough, MA. Of these two responses, only Spectrum Communications proposal was complete and provided enough detail to be accepted as a responsible bidder. Additionally Spectrum Communications was the only CMAS(California Multiple Award Schedule) contractor who bid this project. Spectrum was awarded a three (3) year contract, signed 1/11/00, and expires 6/30/2003.

Section 10299 of the Public Contract Code grants local agencies and school districts the authority to purchase information technology without competitive bidding. Part(b) of section 10299 states "school districts may, without further competitive bidding, utilize contracts, master agreements, multiple award schedules, cooperative agreements, or other types of agreements established by the department for use by school districts for the acquisition of information technology, goods and services." Section 10299 was passed by the California Legislature and signed into law by Governor Davis. Consequently, it is clear that school districts have the authority to use CMAS for the purchase and acquisition of technology.

COPY CONTRACT

Contract No. Romoland-Spectrum
2000-01

This AGREEMENT is hereby entered into between the Romoland Unified School District, hereinafter referred to as the "DISTRICT", AND THE Contractor as follows and hereinafter referred to as the "CONTRACTOR":

CONTRACTOR: Spectrum Communications Cabling Services, Inc.
226 N. Lincoln Avenue
Corona, CA 91720
California Contractors License 713776

The CONTRACTOR will provide the labor, materials and related drawings and specifications for all work described in "Attachment 1" (the "WORK") and also for work described in any Form 471 that the DISTRICT files pursuant to Form 470 application number "666450000263290" ("SUBSEQUENT WORK") under the applicable California Multiple Award Schedule (CMAS) contracts. The CONTRACTOR agrees to perform all of its obligations under this contract in compliance with all applicable laws.

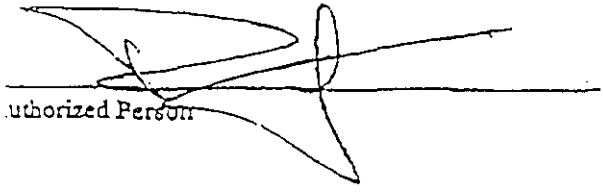

In exchange for the performance of the Work, the DISTRICT agrees to pay the CONTRACTOR the amount stated in Attachment 1. In exchange for the performance of the SUBSEQUENT WORK, the DISTRICT agrees to pay the CONTRACTOR the sum total of the amount of E-Rate funding received for the SUBSEQUENT WORK and the relevant matching funds. The contractor agrees that the DISTRICT may reduce the scope of or abandon any of the WORK and/or SUBSEQUENT WORK based on the E-Rate funding received per form 470 application number "666450000263290" and local matching funds and agrees that the DISTRICT may make changes at its sole discretion. In the event the DISTRICT does not receive E-Rate funding per Form 470 application number "666450000263290" and local matching funds this contract will terminate and neither party will have any duty to perform its obligations hereunder. Otherwise, this Contract will expire upon June 30, 2003. The DISTRICT must make all payments required under this Contract within forty-five (45) days of the completion of the WORK and any SUBSEQUENT WORK.

This Contract and its attachment(s) constitute the entire understanding and agreement between the parties and it supersedes any prior or contemporaneous agreements, representations or promises by either party. This Contract can only be modified by a written agreement signed by both parties.

ACCEPTANCE OF PROPOSAL: The above prices, Specifications, Terms and conditions are satisfactory and are hereby accepted. The Contractor is authorized to do the work as specified. The DISTRICT agrees to pay as outlined above. It is understood and agreed that this is work not provided for in any other agreement and no contractual rights arise until this proposal is accepted in writing.

HIS AGREEMENT IS ENTERED INTO THIS 11 DAY OF Dec, 2000.

CONTRACT NUMBER: 3-01-70-0282AA

GSA TERM: 5/11/2000 through 9/30/2005

DISTRIBUTION: STATEWIDE

CMAS Schedule AA - Based on GSA #GS-35F-0398K (Mitel)

This contract is available for use by State of California agencies and any city, county, city and county, district or other local governmental body or corporation empowered to expend public funds. While the State makes this contract available, each local agency should make its own determination whether the CMAS program is consistent with their procurement policies and regulations.

CMAS Contractors are required to provide all CMAS and Federal contract terms and conditions with the list(s) of products, services, and prices. These terms and conditions may include guarantees and other important provisions not included on the contract cover page. PLEASE REQUEST FROM CONTRACTOR A COPY OF ALL CONTRACT TERMS AND CONDITIONS IF NOT PROVIDED INITIALLY.

REPLACE "MITEL" WITH "SPECTRUM COMMUNICATIONS CABLING SERVICES, INC." WHERE "MITEL" IS REFERENCED IN THE FEDERAL TERMS AND CONDITIONS.

A handwritten signature in cursive script that reads "Elaine Hall".

Romoland School District
Subj: Selective review yr 2002
Date: 1/31/03

In Response to your fax dated 1/27/03. We did not receive any other quotes, bids, or proposals other than the quotes received from Spectrum Communications. The response we received from Osicom Communications was incomplete and had no attached price quotation and therefore could not be considered. As a result a price-based comparison was not possible. If the District had received multiple quotes, price would have been the single most heavily weighted selection criterion.

I would like to again state that by selecting a CMAS contractor we are participating in an existing competitively assessed and cost compared multiple award contract. For a small school district in a rural location, the ability to use CMAS gives us the advantage to receive the volume buying power of the State of California and to select contractors in our geographic location.
